

MATERIALS DELIVERY, STORAGE, AND HANDLING

PART 1 - GENERAL

1.01 DELIVERY:

- A. Deliver materials and products in manufacturer's original unopened packaging with identification labels intact and legible.
- B. Replace damaged or contaminated containers and materials.

1.02 STORAGE:

- A. Secure manufacturer's specific recommended storage requirements for products and materials to be stored.
- B. The following storage requirements are in addition to suppliers recommended storage requirements:
 - 1. Store materials off of ground and concrete floors.
 - 2. Cover and protect materials from damage due to weather and construction operations.
 - 3. Maintain stored materials clean and free of dirt, grease, foreign matter and construction debris.
 - 4. Store sheet materials on end.
 - 5. Store roll materials on end.
 - 6. Store emulsion and liquid type products in temperatures above 40 deg. F.
- C. The Contractor shall be responsible for compliance with storage requirements for his Work.
- D. Materials damaged due to improper storage shall be replaced by the Contractor at no cost to the Owner.

1.03 HANDLING:

- A. Handle sheet materials, such as drywall, to avoid undue sagging.
- B. Handle rolled goods so as to prevent damage to edges and ends.

1.04 PROTECTION:

- A. Protect as follows:
 - 1. Protect steel materials from corrosion.
 - 2. Protect finished surfaces from damage.
 - 3. Protect insulation from direct sunlight and moisture.
 - 4. Protect edges of sheet material from damage.

- END OF SECTION -
