Me3Co Report 21-July-2023

This is progress report that is done until now. There are two video attached here.

1. This video includes website functions that includes provided code functions. I am working on it. This is video link https://recordit.co/qCbFHIi6u3

2. This video includes the difference between code provided and the changed code on which I am working. This is video link https://recordit.co/s5PpdzX128

3. In second video green files are new added files and in comparison one green background code is new added one on right side. Left side code is given code.

4. As I am working on it. It is best for us to continue this project instead of creating from scratch.

5. It will take almost one and half week to complete the code that is missing in provided code.
6. After that I will start the changings mentioned by you or you will mention later.
7. According to my decision, it is good for us to start it from here as it will reduce our time.
